CALL FOR PAPERS

<http://www.twuc.mine/conferences/twuc2008>

The 3rd Workshop on Trustworthy Ubiquitous Computing (TwUC 2008) is held in conjunction with IIWAS 2008, November 24-26, 2008, in Linz, Austria.

Ubiquitous applications are getting more and more to the market these days. In spite of many applications and projects in the area of ubiquitous and pervasive computing the success of this technologies and the acceptance from the user is still low resulting from missing trust into computing systems introduced into our real world.

TwUC was established to provide a forum to scientists, engineers and industry to address recent research results, to present and discuss their ideas, theories, technologies, systems, tools, applications, work in progress and experiences on all theoretical and practical issues and to elaborate about the research areas of security, reliability and privacy which build the basis for creating trustworthy interfaces and computing environments for people interacting in ubiquitous environments.

TOPICS OF INTEREST

The conference program will include invited talks, peer reviewed full papers and short papers around but not limited to the following topics:

<p>Security in ubiquitous computing environments</p> <ul style="list-style-type: none"> • security issues and technologies • usage policies • identity and access • threat and vulnerability • malicious software in ubiquitous environments • integrity • trusted computing • trusting platforms 	<p>Reliability in ubiquitous computing environments</p> <ul style="list-style-type: none"> • software design • software quality and metrics • user perceived QoS • methods and concepts to enhance and ensure availability
<p>Privacy in ubiquitous computing environments</p> <ul style="list-style-type: none"> • issues and appliances on privacy in ubiquitous computing environments • data and information ownership and sovereignty of social and technical methods for ensuring confidentiality 	<p>Usability in ubiquitous computing environments</p> <ul style="list-style-type: none"> • Designing the user interface in ubiquitous environments • Designing Interaction for ubiquitous appliances • Usability Evaluation Methods in ubiquitous environments

IMPORTANT DATES

Paper submission	Sep. 1, 2008	Camera-Ready Papers	Oct. 15, 2008
Acceptance Notification	Oct. 1, 2008	Workshop	Nov. 24-26, 2008

PUBLICATION

All accepted conference papers will be published together with the iiWAS2008 / MoMM2008 proceedings by the **ACM digital library** and the **Austrian computer society books@ocg books series**.

SUBMISSION

The TwUC2008 workshop solicits full and short research papers. For detailed information concerning the submission please visit our website.
